

SHIVAM SINGH

Front-End Web Developer

An ambitious front-end developer capable of writing quality code and developing useful and usable web applications while providing a great user experience. I learned JavaScript and React.js by working on several projects to satisfy my own curiosity, and I'm excited about the prospect of using my knowledge in frontend development and design to obtain an entry-level role in the community.

- ◆ Opportunity to gain hands-on experience in a professional setting Work with an experienced development team and learn from their expertise.
- ◆ Troubleshoot and debug issues as they arise. Work with the team to identify new features and implement them in a timely manner.

Front-End Developer Aqusag Technologies

Noida

06/2022 - Present

Achievements/Tasks

- ◆ I develop and maintain client-facing web applications, working closely with the design team to create visually appealing and user-friendly interfaces.
- ◆ Communicate progress and updates to the team regularly.
- ◆ I have worked on various live projects during my time, one of the them was work order management system, which allowed for real-time tracking and status updates of work order information.
- ◆ I have contributed to the development of our company's in-house design system, collaborating with the design team to create reusable components and styles for streamlined development and consistency across projects.

EDUCATION

Bachelor of Technology

Dr. A. P. J. Abdul Kalam Technical University

08/2017 - 08/2021

7.6 CGPA

Courses : Computer Science

PERSONAL PROJECTS

YouTube Clone (02/2023 - 02/2023)

- ◆ **Real-world experience:** This project will provide an opportunity to build a real-world web application that mimics the functionality of a popular platform. This will provide valuable experience and insight into the development process.
- ◆ **API integration:** This project will also provide an opportunity to work with APIs and learn how to integrate them into a web application.
- ◆ **Styling with Material-UI:** Material-UI is a popular library for building responsive and modern user interfaces. This project will allow developers to practice their styling skills using this library.
- ◆ Overall, this project will provide an excellent opportunity to learn and practice key skills and gain valuable experience building a web application using ReactS, RapidAPI, and Material-UI.

E-commerce Makeup Website (01/2023 - 01/2023)

- ◆ This project will be built using the ReactJS framework, which is a popular and powerful tool for building user interfaces. The Swiper library will be used to create a responsive and interactive image slider, while Framer Motion will be used to create animations and transitions for a smooth and engaging user experience.
- ◆ **Product catalogue:** Users can browse through a catalogue of makeup products, which will be displayed using a grid layout with images, names, and prices.
- ◆ **Product details:** Users can click on a product to view more details, such as a description, ingredients, and review.
